-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "250" has been used to designate both a cap screw (page 4, line 2) and a side wall (page 4, line 11). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: typo error, page 6, line 27, "vanes 600" should be "vanes 630". Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3723

4. Claims 1, 2, 4, 10, 11, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Leliaert (USPN 3,683,556). Leliaert discloses an abrasive blast wheel assembly comprising a wheel having a face 8 and an axis 64 generally perpendicular to the face 8, a plurality of vanes 18 extending from the face 8 of the wheel, each vane 18 having a heel end towards the axis 64 of the wheel and a discharge end opposite the heel end, an impeller 56 positioned about the axis 64 of the wheel, the impeller 56 having a media inlet at one end adapted to receive blast media and a plurality of impeller media outlets constructed and arranged to allow egress of blast media upon rotation of the impeller 56, a control cage 28 surrounding the impeller 56 and having a cage media outlet 54 adapted for passage of blast media to the heel ends of the vanes 18 and a channel (at portion 32) formed between the impeller 56 and the control cage 28, wherein the channel is formed on the inner side of the control cage 28, wherein the housing has a first thickness in a portion that does not include the channel and a second thickness less than the first thickness in a portion that include the channel (note Fig. 4, col. 2, line 24 to col. 3, line 63).

Allowable Subject Matter

5. Claims 3, 5-9, 12-18 and 21-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Macmillan et al is cited to show abrasive throwing wheel.

Art Unit: 3723
